

Comparación Detallada y Justificación Metodológica: Items de Tausch et al. (2011) vs. Variables GSS 2004

Ítems/Fraseo en Tausch et al. (2011) (Texto Exacto)	Variables GSS 2004 (Código y Texto Exacto)	Análisis de Similitud y Justificación Metodológica
DIMENSIÓN: ACCIÓN COLECTIVA NORMATIVA		
“...respondents were asked to indicate how likely it was that they would participate in 16 different actions... (1 = very unlikely, 7 = very likely).” (Estudio 1)	Fraseo introductorio para SIGNDPET a INTERPOL: “Here are some forms of political and social action that people can take. Please indicate, for each one, (1) whether you have done any of these things in the past year, (2) have done it in the more distant past, (3) have not done it but might do it, (4) or have not done it and would never, under any circumstances, do it”	Justificación de Escala: Aunque Tausch usa una escala Likert de probabilidad futura, la escala de GSS es válida para medir el constructo. La opción (3) “have not done it but might do it” captura la propensión o disposición a la acción, mientras que las opciones (1) y (2) capturan comportamiento real, lo cual refuerza la validez del constructo. Se operacionaliza la disposición/acción normativa combinando estas respuestas.
“sign the complaint against unconstitutionality of tuition fees” (Est. 1) “sign a petition to the government” (Est. 3)	SIGNDPET: “Signed a petition.”	Coincidencia Alta (Validez de Contenido): El ítem de GSS es la acción genérica exacta que Tausch contextualiza. Es un indicador central de acción normativa.
“join in a peaceful public rally, protest, or demonstration” (Est. 3)	JOINDEM: “Took part in a demonstration.”	Coincidencia Alta: Terminología idéntica para la acción.
“participate in discussion meetings, participate in plenary meetings” (Est. 1)	ATTRALLY: “Attended a political meeting or rally.”	Proxy Fuerte: Captura la asistencia a espacios de organización y deliberación política convencional.
“lobby a member of Parliament” (Est. 3)	CNTCTGOV: “Contacted, or attempted to contact, a politician or a civil servant to express your views.”	Coincidencia Alta: "Lobbying, ^{es} una forma específica de contactar a un político. El ítem GSS generaliza esta acción normativa institucional.
“voting intentions” (Est. 3, variable dependiente)	VOTE00: “In 2000... Do you remember for sure whether or not you voted in that election?”	Validez Ecológica: GSS mide comportamiento pasado real frente a la intención futura de Tausch. El voto es la acción normativa por excelencia.
(Ítem no explícito en Tausch, pero teóricamente consistente con acción normativa)	AVOIDBUY: “Boycotted, or deliberately bought, certain products for political, ethical or environmental reasons.” POLFUNDS: “Donated money or raised funds for a social or political activity.”	Enriquecimiento del Constructo: Estas variables se añaden al índice de Acción Normativa por poseer alta validez facial y de contenido dentro de la literatura de participación política convencional, fortaleciendo la medición del constructo en GSS.
DIMENSIÓN: ACCIÓN COLECTIVA NO NORMATIVA (NO VIOLENTA)		
“disturb events where advocates of tuition fees appear, block university buildings, block the highway” (Est. 1, catalogadas como "moderate, nonviolent nonnormative actions")	OPPSEGOV: “There are different opinions about people’s rights in a democracy. On a scale of 1 to 7, where 1 is not at all important and 7 is very important, how important is it–That citizens may engage in acts of civil disobedience when they oppose government actions.”	Operacionalización Actitudinal (Proxy): GSS no pregunta por la intención de bloquear calles, sino por la valoración de la <i>importancia del derecho</i> a la desobediencia civil. Justificación: Se utiliza como proxy bajo el supuesto de que quien otorga alta importancia/legitimidad a la desobediencia civil tiene mayor propensión actitudinal hacia este tipo de acciones no normativas descritas por Tausch. Es una limitación (actitud vs. intención conductual) que debe declararse, pero es la mejor aproximación disponible.
DIMENSIÓN: ACCIÓN COLECTIVA NO NORMATIVA (VIOLENTA)		
“throw stones or bottles, arson attacks on university buildings... attacks on police” (Est. 1) “Support for violence... attitudes toward violence against military and civilian targets” (Est. 3)	(No hay variables equivalentes directas en GSS 2004 sobre participación o apoyo a la violencia política propia). Variable descartada por invalidez conceptual: REVMEET: “Should people who want to overthrow the government by force be allowed to hold public meetings?”	Limitación del Estudio (Validez de Constructo): No es posible operacionalizar válidamente esta dimensión con GSS 2004. Justificación del descarte de REVMEET: Esta variable mide tolerancia política (derechos civiles de terceros) y no la propensión del encuestado a la acción violenta ni emociones de confrontación. Usarla induciría un error grave de medición. Por tanto, el análisis se limita a contrastar Acción Normativa vs. Acción No Normativa (Desobediencia Civil), excluyendo la violencia radical.

Extracto GSS 2004 (.txt)

```
883) SIGNDPET
Here are some forms of political and social action that people can take. Please indicate, for each one, (1) whether you have done any of these things in the past year, (2) have done it in the more
↪ distant past, (3) have not done it but might do it, (4) or have not done it and would never, under any circumstances, do it--Signed a petition.
RANGE: 1 to 9
      N      Mean      Std. Deviation
Total    1472      2.128      1.12
1) Have done it in the past year      515 35.0
2) Have done it in the more distant past    458 31.1
3) Have not done it but might do it    338 23.0
4) Have not done it and would never do it   151 10.3
